

# CEE Gas Committee Concurrent Session

Wednesday, June 11, 2008  
12:15 – 1:00 PM EST

Working Together, Advancing Efficiency

# Objectives of this Session

- Summarize the Committee's progress in the first half of 2008
- Discuss direction in areas not covered by other Gas Committee breakout sessions
- Set expectations for work to be done in the second half of the year

# Commercial Water Heater Exploration

- CEE has developed a Commercial Water Heating Market and Technology Characterization
- CEE has conducted a Survey of Gas Committee interest in commercial water heating

Next Steps: Hold call in late June to establish if there is enough member interest in this topic to pursue it as a priority work area for the Gas Committee

# Combined Space and Water Heating

- Tasked at January Meeting to look into further
- Attended NRCan Combo Unit Workshop
- April call with Gas Committee to discuss member perspectives and a scope of work

In addition to monitoring the development of an efficiency measure, how should we proceed?

# Tankless Water Heater Field Study

- Field Study materials were developed in 2007 for Gas Committee members
- It's purpose is to:
  - Be a guideline for members seeking to conduct their own field testing
  - Create comparable results across different studies

CEE is offering to serve as a central clearing house for project results and is Seeking a member to champion this effort

## Partnerships with Peer Organizations - American Gas Association

- AGA is becoming more interested in the role of natural gas in a carbon constrained world & promoting the efficient use of gas
- We are seeking to understand what impact this interest will have on CEE member programs
- Also potentially an opportunity to leverage greater resources

## Partnerships with Peer Organizations – Energy Solutions Center

- Focus on gas technology commercialization using energy efficiency as a selling point
- Potential exists to work together on workshops, marketing pieces and case study dissemination
- Seeking to reduce duplication of effort to better serve common members

Does partnering with AGA & ESC serve to further the Gas Committee's goals?

# Other Work Areas for 2008

## Program Summaries

- Aid Gas Committee in explorations
- Provide info to Manufacturers on where to find programs
- 9 out of 33 programs have responded
- Aid Gas Committee in explorations
- Provide info to Manufacturers
- 9 out of 33 programs have responded

**We need your help!**

## Rooftop Unit Exploration

- Attended NR Can meeting
- Have not made much progress with manufacturers
- Need to demonstrate that a gas load from RTU exists
