

## NYSERDA Programs – Commercial Lighting

- Current Activities
  - Prescriptive programs with specific technologies incented
  - Performance-based programs: \$/kwh and kw reductions due to lighting
  - Peak Load Reduction approaches: Lighting as a demand response, commercial lighting in NYC
  - Lighting as a part of Whole Building Approach
  - Working with upstream market participants: over 5 million sq. ft. affected

## NYSERDA Programs – Commercial Lighting

- New Program Designs
  - Whole Building approaches for new construction and existing buildings
  - Continued Peak Load Reduction/Demand Response activities
  - LEED™ and High Performance Buildings
  - Shift to a Sector focus: lighting needs depending on type of customer (e.g., hospitality, industry, commercial real estate, K-12 schools)
  - Business Partners: services and incentives for upstream market participants in NYSERDA programs.

## NYSERDA Programs – Commercial Lighting

- **The Future**
  - Technology: controls, new lighting products
  - Services: Application-based (SCLP), daylighting collaboration (R&D and deployment), operations & maintenance (Building Performance, Commissioning, RCx)
  - Matching customers with business partners
  - Other: regional consistency
