

# HVAC Program Planning

Joe Schmutzler  
Commercial Rebate Program Manager

29 September 2009

**PUGET SOUND ENERGY**

*The Energy To Do Great Things*

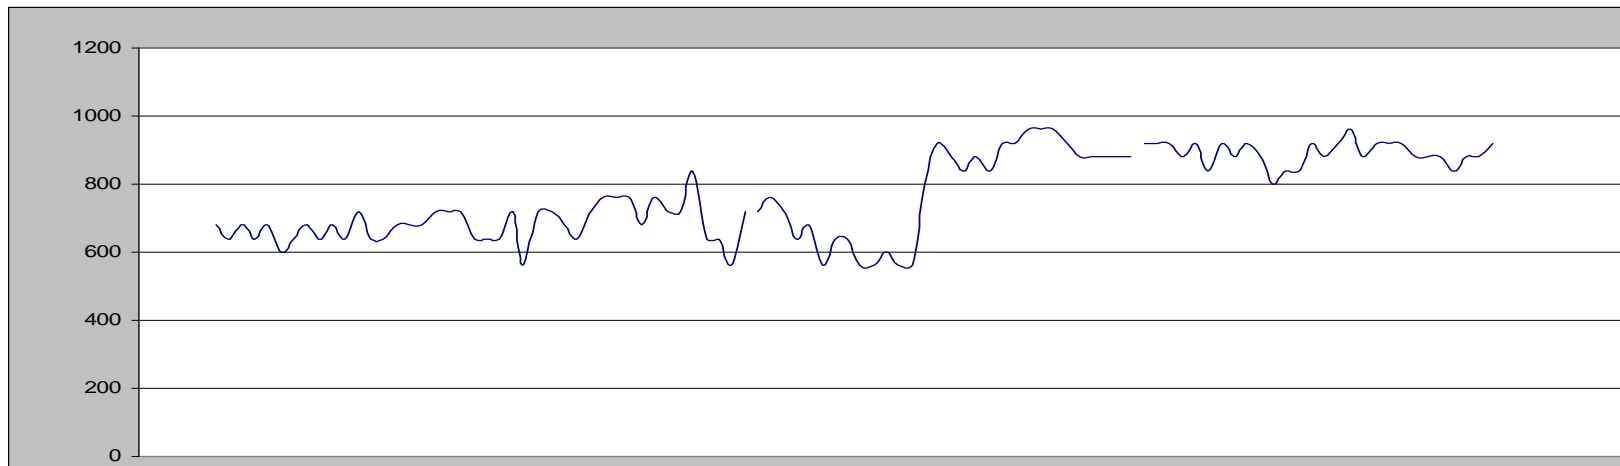

# Current HVAC Programs

---

- Program goals
  - Cost effective and assured energy savings
  - Market transformation
- Program Successes
  - Consistently exceeding goals
  - Rapidly expanding Premium Service program
- Program Challenges
  - HVAC unit rebates are not as cost effective
  - Controls are often very cost effective, but many different protocols and verification of savings an issue

# Future Plans

- Currently testing Premium Service protocols
  - BPA is piloting the program in other service territories
- Focusing more on controls
  - Variable speed systems
  - Demand control ventilation may be more cost effective
  - Prescriptive approach for DDC systems
    - Third party commissioning

---

Thank you!
