

# Envisioning the Next Generation of Lighting Programs

Working Together on a Comprehensive  
Approach

Eileen Eaton  
Program Manager  
September 30, 2009  
New Orleans, LA

# Agenda for Lighting Session 2

- ▶ Define what is a Comprehensive Program Approach
- ▶ Review most common consumer types
- ▶ Group Work
- ▶ Report back
- ▶ Discuss Next Steps

# Our Task

▶ Can we design comprehensive program models that combine these elements to deliver energy savings?

- Traditional technologies
- Emerging technologies (SSL)
- Controls
- Daylighting
- Design

# Group Work

- ▶ What specific messages should be delivered to this consumer type regarding energy efficient lighting and how should they be communicated?
- ▶ What types of technologies are applicable to this space?
- ▶ What performance indicators and metrics are necessary for evaluating, measuring, and verifying savings?
- ▶ What data do regulators need to support this approach and how can efficiency programs and manufacturers work together to provide them?
