

CEE Commercial Clothes Washer Initiative

Qualifying Product List June 19, 2006

CEE's qualifying products lists are updated periodically. See the CEE Web site (www.cee1.org) for the most recent listing. For Terms and Usage of this list, please see www.cee1.org/terms.php3

NOTE: Performance levels for qualifying washers were modified on Jan. 1, 2004

Other considerations:

- (Parentheses) indicate the model is discontinued but available. Asterisks (*) are used to indicate that a coding variable number or letter may be used in the place of the asterisks to indicate a color or feature that does not affect the models energy efficiency.
- Although all models on the CEE list are very efficient, the tiers are structured so the most efficient products are listed in the higher tiers. For example, Tier 3B would contain the most efficient models.
- The list is updated when new product information is received. Check back frequently to ensure you have the most current list.
- Models labeled "stacked-gas" or "stacked-electric" have a washer and dryer combined into one unit. CEE only requires test data for the washer and doesn't certify the efficiency of the dryer component.

TIER 1 MEF 1.42, WF 9.5

Brand	Model	Brand	Model
