## Commercial, Family-Sized Clothes Washer Qualifying Product List

### Based on 2007 CEE Commercial, Family-Sized Clothes Washer Specification

#### January 2, 2007

CEE's qualifying products lists are updated periodically. See the CEE Web site ([www.cee1.org](http://www.cee1.org)) for the most recent listing.  
For Terms and Usage of this list, please see the [CEE Web site](#).

**CEE does not administer rebate programs. Consumers who have questions about filling out rebate forms should contact their local efficiency program administrator (often the local utility).**

**Other considerations:**

- *Red italics* indicate that a product is inactive. Asterisks (\*) indicate that a coding variable may be used in place of the asterisks to indicate a color or feature that does not affect washer efficiency.
- *Blue italics* indicate a U.S.-only model. *Green italics* indicate a Canada-only model.
- Although all models on the CEE list are very efficient, the tiers are structured so the most efficient products are listed in the higher tiers. For example, Tier 3 would contain the most efficient models.
- The list is updated monthly. Check back frequently to ensure you have the most current list.
- Models labeled "stacked-gas" or "stacked-electric" have a washer and dryer combined into one unit. CEE only requires test data for the washer and doesn't certify the efficiency of the dryer component.
